while existential issues perhaps concern people the most today s education is not as preoccupied with such issues instead education is becoming more uniform and streamlined more and more one sidedly directed towards what is useful the purpose of this book is to focus on education s existential dimension such a focus requires at least three things firstly we need to justify why it is necessary to reconnect with existentialism in education secondly we need to undergo an examination of the quality of existential education so that we can have a basis as to what kind of educational interests teachers should have thirdly we need to gain knowledge about how teachers may teach in light of existential matters however to teach in light of existence is highly paradoxical in that existence cannot be forced on someone but is rather a subjective matter teaching which is non ironical or too direct can thus be very problematic concerning existential issues the reason being that there is no objective truth in terms of existence there is only a matter of subjective or existential truth which is only true for the single individual therefore the book suggests that the approach teachers take must be discrete and indirect so as to create room for students to take

responsibility for their subjective truth such an indirect pedagogy is not a programme but rather a form of existential education the overall aim of the book is by way of introducing and developing the concept of indirect pedagogy to extend and reinvent the language of teaching
